

Konstantin Glazov

Senior Full Stack Engineer | Technical Lead | AI Integration Specialist

Toronto, ON (Etobicoke)

416-875-3459

kglazov@gmail.com

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 20+ years delivering enterprise-grade solutions at TD Bank, Bell Canada, Deloitte, and City of Toronto. Currently building two production AI-powered SaaS platforms — Pulse HMS (healthtech) and NestHub360 (proptech) — with live Claude API integration. Expert in Node.js, TypeScript, Next.js, PHP/Laravel, and cloud-native architectures on AWS and Azure. Available immediately for Toronto-based contracts.

TECHNICAL SKILLS

AI / LLM:	Anthropic Claude API, LangChain, LLM Integration, OCR Extraction, Semantic Search, RAG
Languages:	TypeScript, JavaScript ES6, PHP, Python, Java
Frameworks:	Node.js, Next.js 16, React 19, NestJS, Express.js, Laravel, Symfony, Vue, Flask, Django
Databases:	PostgreSQL, MySQL, MongoDB, Redis, Oracle, Elasticsearch, CosmosDB, Supabase
Cloud:	AWS (EC2, S3, RDS, Lambda, CloudFront, Cognito, SQS), Azure (AKS, ADX, Maps, ADFS), Vercel
DevOps:	Docker, Kubernetes, GitLab CI/CD, Azure DevOps, GitHub Actions
APIs:	REST, GraphQL/Apollo, Kafka, WebSockets, OAuth 2.0, SAML 2.0, JWT, MSAL
Security:	OWASP, AES-256-GCM, XSOAR, IAM/RBAC, PIPEDA, WCAG 2.0 AA / AODA
Methodologies:	Agile/Scrum, Microservices, DDD, TDD, Domain-Driven Design

PROFESSIONAL EXPERIENCE

Pulse HMS | Founder & Lead Developer

Mar. 2026 – Present

Independently designing and building a multi-tenant AI-powered Healthcare Management SaaS from the ground up.

- Architected multi-tenant SaaS with RBAC across 7 roles using Clerk, Next.js 16 App Router, and PostgreSQL with 30+ Prisma models covering appointments, billing, treatment plans, and audit logging.
- Integrated Anthropic Claude API for insurance card OCR extraction and semantic patient search, with Redis sliding-window rate limiting for production reliability.
- Built field-level AES-256-GCM encryption for patient PII (DOB, health card numbers, insurance data), PIPEDA-aligned data handling, HSTS, and CSP headers.
- Developed Stripe-integrated subscription billing engine with webhook-driven payment state, trial management, and per-clinic feature gating.
- Implemented real-time SSE notification system backed by Redis pub/sub for multi-instance delivery across all user roles.
- Maintained 80%+ test coverage using Jest with full mock infrastructure across server actions, services, and API routes.

Technology: Next.js 16, React 19, TypeScript, Node.js, PostgreSQL, Prisma, Redis, Clerk, Stripe, Claude API, Vercel, Docker, Jest, Tailwind CSS, Sentry

NestHub360 | Founder & Lead Developer

2025 – Present

Building a multi-tenant AI-powered property management SaaS platform for the Canadian condo market.

- Architected multi-tenant platform with 6-role RBAC, 35+ PostgreSQL models on Supabase covering maintenance, payments, bookings, and document storage.
- Integrated Claude API for AI-powered form generation — property managers create custom surveys, polls, and community voting forms from natural language prompts.
- Shipped 25+ RESTful API routes with strict multi-tenant data isolation, plan-based feature gating, and AES-256-GCM field-level encryption.
- Built regional pricing engine for multiple Canadian markets with locale-aware routing across 6 internationalization locales.

Technology: Next.js 16, React 19, TypeScript, Node.js, PostgreSQL (Supabase), Prisma, Clerk, Claude API, Vercel, Tailwind CSS, Zod

City of Toronto — Parks, Forestry & Recreation | Senior Developer / Technical Lead

Mar. 2023 – Feb. 2026

Solo delivery of enterprise asset management and operational tracking systems (DAS and PMIT projects) for one of Canada's largest municipal governments.

- Architected and delivered Digital Asset System (DAS) and Property Management IT (PMIT) enterprise applications end-to-end as sole developer, including architecture, implementation, and knowledge transfer.
- Integrated AI-powered features using LangChain within Node.js ecosystem to support intelligent workflows and data processing.
- Engineered offline-capable IndexedDB functionality and server-side pagination for high-volume asset datasets.
- Ensured WCAG 2.0 AA and AODA compliance across all public-facing UI components; implemented LDAP/IAM authorization with gates and policies.
- Built and maintained GitLab and Azure DevOps CI/CD pipelines for automated testing and deployment across environments.

Technology: Node.js, TypeScript, React, NestJS, Oracle, Redis, Docker/Swarm, GitLab CI/CD, AWS, LangChain, LDAP/IAM, WCAG 2.0 AA, AODA

Bell Canada | IoT Developer

Jun. 2022 – Mar. 2023

Designed and developed IoT microservices for real-time telemetry ingestion and secure multi-tenant backend APIs.

- Built scalable Node.js microservices for assets, products, zones, and trailers APIs integrated with Geotab and BeWhere IoT platforms.
- Implemented geospatial APIs using Azure Maps and Cosmos DB; designed caching strategies with Azure Data Lake and Redis.
- Developed secure auth frameworks using OAuth 2.0, SAML 2.0, TYK Gateway, and RHSSO; created GraphQL APIs for data ingestion.
- Automated CI/CD pipelines in Azure DevOps; deployed containerized microservices to AKS (Azure Kubernetes Service).

Technology: Node.js, TypeScript, MongoDB, Redis, Azure (AKS, ADX, CosmosDB, Maps), Docker, Kubernetes, Kafka, GraphQL, TYK Gateway, RHSSO, OAuth 2.0, SAML 2.0

TD Bank | Application Architect

Jul. 2021 – Jun. 2022

Led design and implementation of network defence automation solutions integrating multiple enterprise security APIs.

- Drove executive software design decisions as architect, developer, and cross-team communicator for network security enhancement platform.
- Integrated Akamai CDN/API, Verizon API, Varnish API, and ServiceNow API into unified security automation workflows using XSOAR.
- Implemented TLS certificate management and trust chain configuration using Akamai; authored cryptographic security modules in Python.

Technology: Python, Flask, XSOAR, Akamai CDN/API, ServiceNow API, Verizon API, TLS/Cryptography, IAM, TDD, Git

Paystone | Senior Developer

Dec. 2020 – Jul. 2021

- Built reputation management platform integrating automated payment processing, customer loyalty, and gift card solutions using TypeScript/React and Apollo/TypeGraphQL.
- Designed microservices and API Gateway for secure data access; implemented real-time bidirectional communication via WebSockets.
- Integrated Twilio API for phone notifications; implemented OAuth 2.0 and JWT security across all API surfaces.

Technology: Node.js, TypeScript, React, GraphQL/Apollo, TypeGraphQL, MongoDB, AWS (Lambda, S3, WAF, Cognito), Twilio, WebSockets, Jest

Deloitte | Senior Full Stack Developer

Sep. 2015 – Jul. 2019

Developed Threat Intelligence Assessment platform serving banking and government organizations across multiple SIEM integrations.

- Built React front-end and Node.js/Express REST APIs for global threat intelligence collection covering CVEs, malware, and indicators of compromise.
- Integrated IBM QRadar, LogRhythm, TruStar, Splunk, and MISP Security Information Event Management APIs.
- Implemented SSO/SLO on Azure with Deloitte Global ADFS/MFA; containerized application with Docker/Kubernetes.

Technology: Node.js, React, Python/Flask, MongoDB, Elasticsearch, Redis, Docker/Kubernetes, SAML 2.0, OAuth 2.0, OpenPGP, Jenkins, Power BI

EARLIER EXPERIENCE

Interpix Design / FCB SIX Consulting | Technical Lead / Senior Developer | 2019–2020

Led SaaS scheduling platform development; built Python/Flask AWS Data Pipelines for HBC Canada; developed Node.js proximity APIs and Ethereum blockchain integration for ActToo. Stack: Node.js, Vue, Laravel, PHP, Python/Flask, AWS, PostgreSQL, Redis, Docker.

Infomart/Postmedia Network | Senior Application Developer | 2012–2015

Developed media monitoring SaaS with social, news, radio, and TV coverage. Built REST API for Realtor MLS management with automated WordPress provisioning on AWS. Stack: PHP/Laravel, MySQL, ElasticSearch, AWS, Java Spring.

Zip Telecom / Devlin Architect | Senior Developer | 2008–2015

Designed NPAC telephony REST API for VOIP number portability (Zip Telecom). Built multi-tenant media portals and SOA integrations at Devlin Architect. Stack: PHP/Laravel, JavaScript, Java/Spring, Oracle, MySQL, AWS.

EDUCATION

B.S. in Computing and Information Systems

Athabasca University

Diploma in Computer Programming and Analysis

Seneca College, Toronto
